

Medical Assisting Program

If a doctor is the heart of a clinic, then a Medical Assistant is its pulse; a driving force that keeps procedures, appointments, and daily tasks running smoothly and efficiently. Medical Assistants (MA) are multi-competent health care professionals responsible for important tasks such as updating patient charts, explaining treatment procedures, and preparing patients for examination.

Medical Assistants work closely with both doctors and patients and the duties vary from office to office, depending on location, size and specialty. This gives Medical Assistants a wide variety of opportunities to choose from once they have finished the program.

Unitek College's Medical Assisting program prepares students to graduate with "industry-ready" skills. Medical Assisting students benefit from hands on experience along with constructive peer groups.

OUR ADVANTAGE:

- Employment assistance
- Experienced instructors
- Financing available*
- Financial aid available*

*For those who qualify.
