

Make a Career Out of Caring

Earn Your Bachelor's Degree in Nursing at Unitek College

The Bachelor of Science in Nursing (BSN) program can lead to a rewarding career as a Registered Nurse (RN) or can be a pathway for current LPNs/LVNs to take their career to the next level. Earning your BSN degree will equip you with the advanced tools and experience you'll need to meet complex demands of healthcare and nursing. In just three years—or less with transfer credits—you can earn your degree and enter the field as a Registered Nurse.

BSNs are the foundation for higher postgraduate study and allow for higher-level responsibilities, such as research, teaching, and management positions. According to the American Association of Colleges of Nursing (AACN), employers recognize that education makes a significant difference. Today, 86.3% of employers require or strongly prefer nurses with a bachelor's degree.¹

Why Choose Unitek College?

Bachelor of Science in Nursing Program Campus Locations

Bakersfield, CA • Fremont, CA • Reno, NV

* For those who qualify. Available for applicants with previous education, including Vocational Nursing courses. Applicants who apply for credit granting may be eligible to skip certain courses in the BSN program.

** Does not apply to the Advanced Placement option, only to students taking the full program.

The baccalaureate degree programs in nursing at Unitek College are accredited by the Commission on Collegiate Nursing Education (www.ccnaccreditation.org).

The program is approved by the Board of Registered Nursing. For more information about our graduation rates and other important facts, visit our consumer information page at: <https://www.unitekcollege.edu/disclosures/>

Why Earn Your Bachelor's in Nursing (BSN) Degree?

Improved job opportunities and salary

Even if you can become a Registered Nurse without a bachelor's degree, BSN-trained nurses generally have broader, higher-paying career opportunities.

Advanced skills mean quality care

A BSN equips you with advanced tools and experience needed to meet the complex demands of healthcare and nursing today. The BSN degree is recognized and respected within inter-professional teams.

Stand out as a job candidate

Healthcare providers know the value of a BSN and most employers (87.4%) now require or strongly prefer nurses with a bachelor's degree.²

More potential for future growth

A BSN can qualify you for higher-level responsibilities, including research, teaching, and management positions. It is also the foundation for continued education and earning a Master of Science in Nursing (MSN) degree.

Annual Median Salary for Registered Nurses: \$71,730
