

Information Technology Program

Unitek College's Information Technology Program is designed to equip graduates with the IT knowledge and skills required to succeed as an IT Professional in a wide range of small to mid-sized business environments. Courses cover the fundamentals of computer technology, including the support and security of networks and how to troubleshoot hardware and software issues.

Our Information Technology labs prepare students to become well-rounded IT professionals and include sophisticated virtual environments to simulate multiple real-world scenarios, as well as physical workstations for hands-on skills training. Lab equipment includes tool, software, and hardware systems. Each student will have the opportunity to test their skills during a 160-hour supervised Information Technology Externship.

Our program will introduce students to the common tools and technologies IT professionals leverage to support computer users in today's businesses, though specific job responsibilities will vary depending on job title and type of company. Graduates of the Information Technology program receive a diploma.

This program will prepare you in:

- PC Repair & Support
- Networking Essentials
- Systems Security
- Windows Desktop Configuration
- Windows Server Configuration
- Office Suite Support

OUR ADVANTAGE:

Employment assistance • Experienced instructors
Financial aid available* • Financing available*

*For those who qualify
