Unitek COLLEGE

Pursue a Challenging Career in the Expanding Field of Information Technology

Earn Your Diploma in Information Technology in as Little as 9 Months

The IT program at Unitek College teaches the basics of computer technology, including the support and security of networks. This program is taught by industry experts and combines in-class instruction with hands-on exercises and a supervised externship. Graduates will be equipped with the necessary skills to obtain positions in Computer System Support.

Information Technology (IT) continues to accelerate and improve the efficiency of businesses and organizations in every sector around the globe. It has also created an enormous demand for IT professionals who can solve security issues and fix hardware or software problems. Due to the dynamic nature of the work, the most successful IT professionals excel at critical thinking and thrive in a fast-paced environment.

Web Developers

Growing Demand for IT Support Specialists

More powerful and complex IT systems are creating enormous demand for IT professionals. As a result, salaries are relatively high and job opportunities are expected to grow much faster than other careers through 2028.[1] In May 2018, the median annual wage for computer user support specialists was $50,980, and the highest 10 percent earned more than $84,510.[1]

Apply Today!

"I really stepped up my game because of the teachers I had. I learned not only book knowledge, but the reality behind the IT world. Even after you graduate, they will still help you and send you job referrals. They led me to my first IT job right after I graduated."
