

## Pharmacy Technician Program

Pharmacy Technicians (PT) assist and support licensed pharmacists with the preparation of medications for patients. They demonstrate a broad knowledge of pharmacy practice and are uniquely familiar with the techniques required to order, stock, package, and prepare medications in accordance with FDA standards.

Pharmacy Technicians perform many of the same duties as pharmacists relating to medication preparation; however, all of a technician's work must be checked by a pharmacist before medication can be dispensed to a patient.

Unitek College's Pharmacy Technician program successfully teaches all the key components for students to graduate, and fully prepares them for a position as a Pharmacy Technician. Pharmacy Technician students benefit from hands on experience, along with constructive peer groups.

### OUR ADVANTAGES:

CA state registration fees included

Employment assistance

Experienced instructors

Financial aid available\*

Financing available\*

I-20 granted\*

\* For those who qualify
